

STF-06... AIR QUALITY (CO₂) FAN CONTROL

Climatix is configured to monitor indoor air quality using a CO₂ sensor.

When the CO₂ level rises, the fan speed increases up to the maximum setpoint to improve air exchange.

Once the CO₂ level drops below the setpoint again, the unit returns to normal operation.

STF-06-1	Air quality fan control, room sensor, CO ₂
STF-06-2	Air quality fan control, duct sensor, CO ₂
