

## STH-S1A-... FIRE DAMPER PLACEMENT, SHUT-OFF IN DUCT (NO ACTUATOR)

Shut-off damper is shown in flow chart in the wiring diagram. The damper is open during normal operation. In the event of fire alarm or power failure, the damper closes to prevent smoke gases from spreading further.

Choose between:

STH-S1A-10	Shut-off damper in supply air duct.
STH-S1A-20	Shut-off damper in extract air duct.
STH-S1A-30	Shut-off damper in supply and extract air duct.
