

## STI-10 COMMUNICATION 4G-ROUTER

The control system is supplied with a 4G router for internet connection to IV Produkt Cloud. The router includes a SIM card that IV Produkt can activate if temporary support is needed.

A SIM card for permanent connection is provided by the customer or as an optional STI-11 accessory from IV Produkt.

The router can be delivered in a box for flexible placement (includes 1 meter network cable, extendable if required).

[User guide 4G-router](#)

STI-10	4G-router mounted in unit's control cabinet
STI-10-1	4G-router in external box. Connects to a 230V socket via a standard plug for easy installation.
